

Carl Mk4 & Mk4E, R7 Onegrip Electric armrests

A surgeon's precision is built on stability. It starts with a quality chair.

The surgical chairs have been meticulously designed in close collaboration with surgeons to meet the needs of exceptional professionals dedicated to excellence. The electric armrests provide unwavering support, ensuring stability and precision when it matters most.

Rini is a Swedish quality manufacturer of high-end ergonomic surgeon chairs since the 1980s, with Rini MedTech as a subsidiary in the US.

Carl Mk4 and Mk4E R7 deliver seamless mobility featuring a dynamic chassis that keeps the chair stable at all times. The electric brake ensures a secure and stable parking position throughout the procedure.

The armrests are individually adjustable in height electrically, offering a wide range of motion and customizable angles, even under a sterile cover.

Heel-controlled height adjustment, ergonomic comfort, and adaptable armrests for clinical flexibility.

Carl Mk4 and Mk4E R7 is built for focus. Designed and manufactured in Sweden, it supports long procedures with consistent comfort and control a reliable partner in the OR.
